Hello World Message in Java

1. First, Launch your Spring STS tool, you'll notice that you get stuck on this screen:
2. choose **C:\DEV**, but it's your choice. So, pick a folder and **click OK**.
3. Now, with Spring STS open, you'll need to start a new project, so choose File -> New -> Java Project
4. Be sure to fill out a program name, I used "helloWorld", but you can use any name you like for this project. Next, you should have the JRE installed.**Now Click Finish**.
5. You may or may not be presented with this window, if you are just click the "Remember my decision" and **click Yes**:
6. We need to create a new file for this project, so click **File -> New -> Class**.

7. Be sure to fill out two fields: **Package** and **Name**, for the Package I used "com.helloworld", for the Name I used "HelloWorld". Now click **Finish**.
8. That should have created a new Class file called "HelloWorld.java"
9. **It should look like this:**

```java
package com.helloworld;

public class HelloWorld
{
  public static void main(String[] args)
  {
    System.out.println("Hello World");
  }
}
```

10. Run the program in "Java Application"
